## Crosby ${ }^{\circledR}$ Kuplex ${ }^{\circledR}$

## Master Links

## All Crosby KUPLEX components have strength characteristics that exceed those of the chain with which they are to be used.

Each Crosby KUPLEX component has a reference which relates to one of the chain sizes listed on Page 429. Where the reference includes a number, e.g. KSS 10N, the number itself refers to the chain size with which it is to be used, in this case 10 mm chain. Crosby KUPLEX $8+107 \mathrm{~mm}$ components are able to accept 7 mm and 8 mm Grade 8 chain and are marked 7/8-8 accordingly. A component having a reference comprising letters only, e.g. KM-C, is a multipurpose component and in order to determine the relevant chain size it is necessary to refer to the appropriate table. All Crosby KUPLEX components are subjected to $100 \%$ non-destructive testing in accordance with BS EN 10228:1999 Part 1. Each Crosby KUPLEX component conforms in all respects with EN 1677.

## Crosby KUPLEX Master Links KM

Generous internal dimensions ensure that the KM series Master Links will fit on to a wide range of crane hooks. (For 3 and 4 leg slings, two KAL series Auxiliary Links must be attached or the KMML range utilized.)

| Crosby <br> Stock No. | Reference | WLL (t) |  | Dimensions (mm) |  |  |  | Weight |

## Crosby KUPLEX Litalink KMML

A cost-effective alternative to the KM/KAL assembly for three leg and four leg slings designed for use only under the uniform load method of working load rating for general use. * All welded construction.
